

**Project 2**  
*Describe  
and  
Transcribe*

**// Outcome**

***Get an opportunity to speak about graphic design. As well as get direction on a poster to be designed. The end of the project should result with each student creating a single black and white 11x17 poster.***

**// Process**

***Separate class in groups of random two's.***

***Select from the preselection of designs that the instructor pulled.***

***Study the selected design in secret without out sharing it with their partner.***

***Take notes on the design and how they are going to explain it.***

***While explaining to your partner you should refrain from using the names of colors, however they can describe the interaction of color in design (i.e. vibrant, soft, contrast etc...)***

***Once finish taking notes, write both names of the pair on the back of the design samples and return them.***

***Now allow students time to explain the design samples to each other as written in their notes.***

***As the explanation is giving the opposite student then creates a 11x17 poster using the same description.***

***Students should not use any color and only rely on the explanation of their partner.***

***After the pairs have finished their designs have them pin them up.***

***As presented each design they should be reunited with the original design sample.***
